Education

Dr. Babasaheb Ambedkar Technological University, BTech in Computer Engineering Nov 2022 – June 2026

- **CGPA:** 7.27/10.00
- **Relevant Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Machine Learning, Compiler Design

Experience

Software Developer Intern, SiliconMount Tech Services Dec 2025 – May 2026

- Developed 15+ RESTful APIs using Java, Spring Boot, Spring Data JPA, and MySQL
- Implemented 6-layered architecture design and DTO mapping, reducing boilerplate code by 40%
- Utilized Spring Data JPA, Swagger UI, and Git/GitHub to improve development efficiency by 30%

NSS Coordinator, Dr. Babasaheb Ambedkar Technological University Nov 2022 – July 2023

- Coordinated 100+ students for community service activities including blood donation camps and awareness programs
- Improved event participation by 30% through enhanced volunteer allocation and strategic planning

Projects

VeriCode | React.js, Express.js, Node.js, MongoDB, Python, AI GitHub

- Engineered an AI-powered code quality analyzer to identify bugs, code smells, and performance issues
- Integrated AI-driven refactoring suggestions to improve code quality and maintainability
- Implemented secure authentication, REST APIs, and MongoDB for efficient code analysis and data storage

Placement Predictor Platform | React.js, Python, Flask, Machine Learning Live Demo

- Created an ML-based placement prediction platform using multiple ML models
- Integrated Flask REST APIs with a React.js frontend for real-time prediction results
- Applied data preprocessing, feature engineering, and feature scaling to improve model performance

AI Email Writer | Java, Spring Boot, React.js, Gemini API, Chrome Extension Live Demo

- Built an AI-powered email reply generator using Spring Boot, React.js, and Gemini API
- Developed a Gmail Chrome Extension for instant AI-generated email replies
- Integrated Spring WebFlux REST APIs with a responsive React.js frontend

Quiz-and-Question-Microservices-App | Java, Spring Boot, Spring Cloud, Microservices GitHub

- Designed a microservices architecture using Spring Boot and Spring Cloud Config Server
- Configured Eureka Service Discovery and API Gateway for dynamic service registration and routing
- Enabled centralized configuration management with dynamic refresh for improved scalability and maintainability

Technical Skills

Programming Languages: Java, JavaScript, Python, SQL

Frameworks & Technologies: Spring Boot, React.js, Node.js, Express.js, REST APIs, Microservices, Spring AI, Machine Learning, Scikit-learn

Databases: MySQL, MongoDB, PostgreSQL

Developer Tools: Git, GitHub, Maven, IntelliJ IDEA, VS Code, Jupyter Notebook, Postman, Swagger UI

Data Analysis & Visualization: Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering, Matplotlib, Seaborn, Plotly

Certifications & Achievements

- Career Essentials in Generative AI (Microsoft & LinkedIn) | Introduction to AI (LinkedIn) | Cybersecurity Job Simulation (Forage)
- Spring Academy - Building a REST API with Spring Boot
- Solved 50+ DSA problems on CodeChef & LeetCode | CodeChef Highest Rating: 1079
